Namaskar

Welcome to the home of premium
BATH FITTINGS & FAUCETS.

The New Product Catalogue is a selection of our most prominent models, showcasing the range of our 'design meets functionality' approach to modern day living. No matter the design, all of our products are made using high quality raw materials and finishes.

Located in capital of India, New Delhi, our manufacturing facility houses a team of experienced craftsmen along the various stages of in-house production.

We are the first manufacturer in India to get a Bureau of Indian Standards (BIS) certification for copper alloy bathroom fitting (ISI 8931/1993) along with URS & UKAS, among other certifications

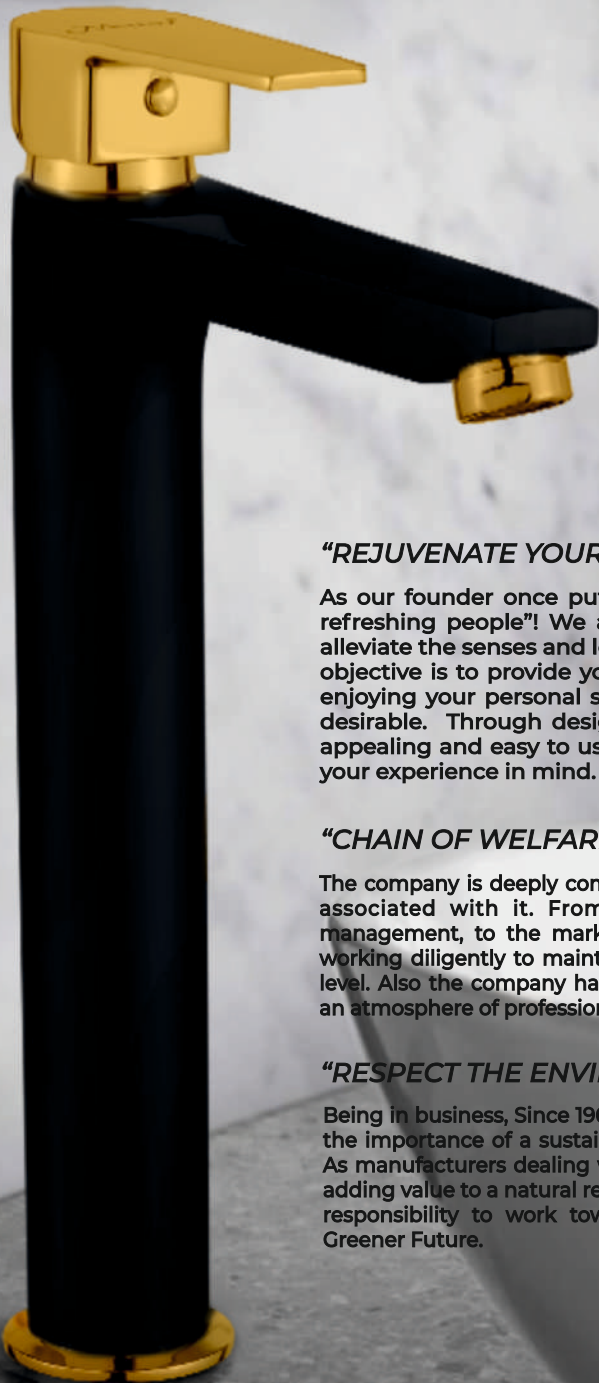

AT *Metro*[®] WE TAKE
PRIDE IN OUR
ROBUST DESIGNS.

Times SME ICONS Award Presented to us by
Dr. Harsh Vardhan,
Former Member of Lok Sabha and Union Minister of India

Refresh. Rejuvenate. Renew.

“REJUVENATE YOUR SENSES”

As our founder once put it “We are in the Business of refreshing people”! We aim to create experiences that alleviate the senses and leave you rejuvenated. Our main objective is to provide you with the right “interface” for enjoying your personal space in a manner that is most desirable. Through designs that are both aesthetically appealing and easy to use, we try to move forward with your experience in mind.

“CHAIN OF WELFARE”

The company is deeply committed to the welfare of everyone associated with it. From the skilled workforce, to the management, to the market chain, the company has been working diligently to maintain the “chain of welfare” at every level. Also the company has maintained & strives to maintain an atmosphere of professionalism in the manufacturing sector.

“RESPECT THE ENVIRONMENT”

Being in business, Since 1960, the company fully understands the importance of a sustainable model for the environment. As manufacturers dealing with metals, we are in business of adding value to a natural resource! We therefore take it as our responsibility to work towards a sustainable model for a Greener Future.

Quality

At Metro-s our approach towards manufacturing a faucet is broadly a two-fold process: The first is at the internal level. Even though this stage of design remains invisible to the finished products, there is a lot that goes into making a faucet durable. From designing to using high grade fittings, we adhere to stringent quality standards in making sure that every faucet we make is internally robust.

Design

“Internal Process + External Appeal = GOOD DESIGN”
 The second design process we engage in deals with the external features. We aim to create designs that are not only easy to operate but also enhance the ambience of your private space, so that every time you use a Metro-s faucet you feel refreshed.

Service

The company acknowledge the importance of the industry it is a part of and takes it as its responsibility to cater to a wide customer base. Renowned as a company for constant innovation in the field, we are driven by our long standing motto-
 “Excellence in Production”
 Providing great service to the customer is of paramount importance to us, and we are constantly striving to understand the needs of our Dynamic Market Base.

Founded with a vision to innovate & cater to a growing need for home-grown bathroom fittings in India's young markets, Metro-s was setup by **Mr. Swarn Singh Jass** in 1960. The brand, having evolved through the decades into a hub of luxury bathroom fitting & faucet, still stands firm on its founding vision. Established under limited resources with feeble technological means of the day, the company thrived as a result of sheer ingenuity & dedication of the workforce, a trait that continues to endure!

A Brief History of OUR COMPANY

1960's

First manufacturing unit is set up in New Delhi. Production begins with high quality gate valves after which the company expands to full turn nickel-chrome plated taps.

1970's

Expanding its scope of manufacturing, Metro-s introduces a complete range of premium bathroom fittings based on its revolutionary Full Turn internal fittings: the iconic Deluxe handle hits the market!

1980's

Metro-s introduces a sophisticated flush system for the modern Indian bathrooms.

2020's

The Company continues to grow as a trusted name in the Indian market with over 300 products

1990's

Using Ceramic Disc fittings, the company pioneers & begins manufacturing Single Levers & Quarter Turns faucets in a variety of coloured finishes.

2000's

The brand answers the urgent call of consumerism by incorporating a more contemporary design language; an approach that has since become synonymous with the brand's image.

2010's

Buoyed by the celebration of its 50th founding Anniversary, Metro-s continues to grow as a trusted name in Indian as well as International Markets with over 250 products in its product catalogue.

PROUDLY MAKING
IN INDIA
SINCE 1960

www.metro-s.com

Renowned as a name for constant innovation & enterprise in its field, the company—now in its 3rd generation of operations—is proud of shaping the bathroom fittings industry in India.
